

Climate Change Resources For Teachers 2018

Climate Change Resources for Teachers

*Climate change is a problem of global proportions whose solution may collectively be our greatest challenge.*¹

COP 21 has set a new global agenda to address climate science, climate impacts, mitigation actions and adaptation measures. Here in Canada the new Federal government has made significant action on climate change part of the general mandate of every Minister.² Leadership on this cross-cutting issue is central to the mandate of the newly renamed Department of “Environment and Climate Change:”

“[Y]our overarching goal will be to take the lead in implementing the government’s plan for a clean environment and a sustainable economy. Your key priority will be to ensure that our government provides national leadership to reduce emissions, combat climate change and price carbon. I expect you to help restore Canada’s reputation for environmental stewardship.”

Success in moving Canada toward a “clean environment and a sustainable economy” will require support and buy-in at all levels of Canadian society that can only be achieved through increased awareness, education, and skills development for the general public, private and public sectors, and especially for youth.

The scope and complexity of climate change presents educators with a formidable challenge. Understanding climate change involves phenomena that cross traditional school subject boundaries ranging from geosciences to media and requires that one have a grasp of the process of change and an understanding of system dynamics. Many climate change scientific findings challenge broadly held societal beliefs and ambitions. How society is presently responding provides an ideal context for new learning.

¹ Weather, Climate and Climate Change: Key Themes in Education for Sustainability, Learning for a Sustainable Future, 2006, page 3.

² The introductory section of the Mandate Letter for each and every Minister includes the following passage: “If we are to tackle the real challenges we face as a country – from a struggling middle class to the **threat of climate change** – Canadians need to have faith in their government’s honesty and willingness to listen. I expect that our work will be informed by performance measurement, evidence, and feedback from Canadians. We will direct our resources to those initiatives that are having the greatest, positive impact on the lives of Canadians, and that will allow us to meet our commitments to them. I expect you to report regularly on your progress toward fulfilling our commitments and to help develop effective measures that assess the impact of the organizations for which you are answerable.” [Emphasis added]

Climate Change Learning

Learning for a Sustainable Future accepts the consensus of the scientific community that human-induced climate change is underway and that impact at some level cannot be avoided. LSF also supports the view that the degree of harm resulting from human-induced climate change can be greatly decreased by taking action now and that action will be required for the foreseeable future.

Climate change is the most complex and wide-reaching challenge facing humankind today; it is essential that we help younger generations to be better equipped to take on this challenge and that we call on their energy, creativity and need to contribute to help us all take up the task.

While climate change presents educators with daunting challenges, these challenges also present valuable opportunities to evolve practice so that students have a sound understanding of climate change and get involved in contributing to solutions in their schools and communities.

Climate Change Presents Educators with Challenges & Opportunities

Complexity

The scope of climate change and its impacts is immense. Everything we do depends on a stable climate. Our understanding of climate change and its impacts requires an understanding of multiple related systems including physical (glaciers, rivers, sea levels), biological (terrestrial, marine) and human (agriculture, energy, health, economy).

A challenge of this complexity provides endless opportunities for learning, from dissecting the individual systems above, to developing critical thinking and media literacy skills, to exploring multiple sources of information to really comprehend the full scope of the issue

Emotions

Discussion of climate change can lead to feelings of fear and anxiety and cause people to distance themselves from the problem, leading them to disengage, doubt and even dismiss it. So how do we address emotions in the teaching of climate change?

Every individual is different, and emotional responses are influenced by the beliefs, worldviews, and existing emotions each individual brings to the table. Classroom cultures of trust must be created where the range of students' perspectives and questions students have on climate change can be expressed and explored through group knowledge building and critical reflection. There are many ways to approach climate change; there is room for fear and hope, wonder and suspense, sadness and curiosity, and all the rest of human emotion.

Changing Worldviews

Addressing climate change requires us to question many of society's norms. This includes: how we define progress and the role of science and technology; capitalism, material growth and consumerism; exploitation of nature; and the dominance of individualistic values, such as freedom, independence, success, performance, social recognition, and comfort. An effective understanding of climate change will be transdisciplinary, apply systems perspectives, span from local to global considerations, and cultivate respectful ways of approaching contested positions—all approaches that are transferable to supporting students' development in other areas!

Conventional Schoolings vs Transformative Learning

Conventional teaching, based on information transfer and finding the “right” answers, does not align well with the complexity of climate change education. With the internet at their fingertips, students have access to more information than they could ever process. And society has not yet found the right answers when it comes to climate change. Our students need more.

Education reforms now promote strategies such as Transformative Learning, Education for Sustainable Development, 21st Century Learning, and others that are better suited to tackling complex problems like climate change. These strategies often begin with the understanding and experiences that students bring with them. Educators, who themselves are grappling with climate change issues, take the role of facilitator and guide learners with their questions. School learning is brought into contact with the real world, allowing learners to cultivate creativity and innovation as they bump into real-life complexities. Students develop the attitudes and skill sets necessary to address challenges to which we don’t yet have the right answers, the same skills they need to be successful individuals, citizens and entrepreneurs.

Climate Change Websites and Links for Educators

This selection of resources has been compiled based on a position of acceptance of climate change as a human-caused phenomenon that is currently negatively affecting the earth and its systems.

Understanding the Science of Climate Change	
What is Climate? Our scientists explain it all to an eleven-year old	https://www.iisd.org/ela/blog/commentary/climate-scientists-explain-eleven-year-old/

Climate Change: Deeper Understanding and Possible and Ways Forward	
Resilience.org aims to support building community resilience in a world of multiple emerging challenges: the decline of cheap energy, the depletion of critical resources like water, complex environmental crises like climate change and biodiversity loss, and the social and economic issues which are linked to these. We like to think of the site as a community library with space to read and think, but also as a vibrant café in which to meet people, discuss ideas and projects, and pick up and share tips on how to build the resilience of your community, your household, or yourself.	http://www.resilience.org/
Union of Concerned Scientists was founded in 1969 by scientists and students at the Massachusetts Institute of Technology. By mobilizing scientists and combining their voices with those of advocates, educators, business people, and other concerned citizens, UCS has built a reputation for fairness and accuracy and amassed an impressive history of accomplishments.	https://www.ucsusa.org/global-warming#.WpsFRHxG0dU

Non-Mainstream Canadian Media that Present Alternative Perspectives on Climate Change	
DeSmog Canada's mission is to make complex energy and environment news accessible to Canadians and to shine a light on critical, under-reported stories.	https://www.desmog.ca/
The Tyee is an independent news outlet that aims to “revive old-style, long-form reporting and shed light on the stories and solutions big media ignores.”	https://thetyee.ca/
National Observer is an independent journalism website with a strong emphasis on ethics and accountability.	https://www.nationalobserver.com/

Climate Change Deniers – Be Aware!	
Friends of Science is a Calgary-based organization that believes the sun is the main cause of climate change, not human activity.	https://friendsofscience.org/
Blog post: “Who needs old-time climate-change deniers when we've got the 'New Climate Denialism'?”	http://rabble.ca/blogs/bloggers/alberta-diary/2017/05/who-needs-old-time-climate-change-deniers-when-weve-got-new

Climate Change Classroom Learning Resources

Learning for a Sustainable Future (LSF) has identified and reviewed a wide range of climate change classroom resources, children's literature books and videos which are available on LSF's Resources for Rethinking (www.R4R.ca) database.

WWW.R4R.CA is a free online database which provides access to over a thousand excellent, peer-reviewed, curriculum-matched resources for educators from hundreds of publishers. These resources include lesson plans, activities, children's literature, and videos. Educators can search by language, jurisdiction, grade, subject, curriculum unit, and sustainability theme in order to get the perfect resource. About 6,600 teachers per month visit the R4R.ca website to access resources.

Climate Change Learning in Grades K-6

Climate change resources on R4R focus primarily on Grade 7-12. Although we believe climate change is an important issue to be taught at all ages, students younger than grade 7 may not have the developmental readiness to confront the full complexity of the problem. Our climate change resources for grades K-6 focus on the "building blocks" of climate literacy, helping teachers to introduce students to foundational concepts including weather, seasons, energy, habitats and responsible citizenship. These resources are intended to foster a strong, positive connection with the natural world and serve as a sound basis for increasing students' understanding of issues related to climate change. To find K-6 climate change resources on R4R, use the "Theme" search; "Climate Change" is a searchable theme under "Air, Atmosphere & Climate." You can then refine your search to explore specific grades or subjects.

Learning for a Sustainable Future (LSF) is a Canadian charitable organization whose mission is to promote, through education, the knowledge, skills, values, perspectives, and practices essential to a sustainable future. LSF has been working with the federal and provincial governments, universities, business, educators and youth across Canada to support Climate Change and Sustainable Development Education since 1991. LSF's innovative programs and strategic partnerships are reshaping education policy and transforming learning methods, helping students learn to address the increasingly difficult economic, social, and environmental challenges of the 21st century.

Secondary School

A. Lesson / Unit Plans

Resource Title	Review	Synopsis	Curriculum Fit	
			Course	Unit
Personal Consumption and Climate Change	http://resources4rethinking.ca/en/resource/images-and-objects-active-learning-toolkit-2-personal	This toolkit focuses on using photographs and a range of active teaching and learning approaches and strategies to explore the themes of climate change, personal consumption and responsible living.	Geography 7 Social Studies 8	Natural Resources Around the World: Use and Sustainability The Individual in Canadian Society: resources & Wealth
Leandro and the Mysterious Case of the Disappearing and Reappearing River	http://resources4rethinking.ca/en/resource/leandro-and-the-mysterious-case-of-the-disappearing	Students work together to think about the importance of rivers to humans and about the consequences and impacts for people and environment when rivers are unpredictable.	Science 8 Geography 8 Science and Technology 8	Water Systems on Earth's Surface Agricultural Territory The Earth and Space
Canada in a Changing Climate: The Living World	http://resources4rethinking.ca/en/resource/canada-in-a-changing-climate-the-living-world-1	Students learn about the impact of climate change on food production in Canada. Through a variety of activities students take a critical look at the various threats that contribute to climate change and find solutions to the problems	Science 7 Geography 7 Science and Technology	Interactions and Ecosystems Plants for Food and Fibre Earth and its climate have changed over geological time Evolution by natural selection Agricultural territory The Living World The Technological World
Canada in a Changing Climate: Society and Economy	http://resources4rethinking.ca/en/resource/canada-in-a-changing-climate-society-and-economy	Students learn about the factors that contribute to climate change and their effects on society, the economy and the environment. They also explore adapting to the existing and projected effects of climate change to reduce risk and take advantage of opportunities.	Science 7 Math 8 Geography 7	Interactions and Ecosystems Statistics and Probability Interactions within Ecosystems Earth and its climate have changed over geological time
Electricity Conservation & You	http://www.resources4rethinking.ca/en/resource/electricity-conservation-and-you	Students explore use and consequences of different renewable and non-renewable sources of electricity. Subject content: renewable vs. nonrenewable energy, causes and consequences of climate change, greenhouse effect, action plan to reduce emissions.	Science & Technology 5 Science & Technology 6 Geography 7	Conservation of Energy & Resources Electricity & Electrical Devices Natural Resources: Use & Sustainability
Arctic Survivor	http://www.resources4rethinking.ca/en/resource/arctic-survivor	Outdoor activity to introduce students to the impacts of climate change on animal populations. Subject content: Habitats, limiting factors, population dynamics, climate change in Canada's north	Science & Technology 5 Science & Technology 6 Geography 7	Conservation of Energy & Resources Electricity & Electrical Devices Natural Resources: Use & Sustainability
Climate Challenge for 11 to 14 year olds	http://www.resources4rethinking.ca/en/resource/climate-challenge-for-11-to-14-year-olds	Students explore the impacts of climate change on communities around the world and the steps being taken to address them. Subject content: Climate change causes & impacts on vulnerable	Science & Technology 6 Social Studies 6	Biodiversity People and Environments

Resource Title	Review	Synopsis	Curriculum Fit	
			Course	Unit
		communities, adaptation, action plans		
Ch Ch Ch Changes	http://resources4rethinking.ca/en/resource/ch-ch-ch-changes	Challenges students to think about the effects of changing climate on sea ice in Canada's north and the related problems and challenges that result. Subject content: Climate impacts on northern life and culture. Graphing, Thermal expansion	Science & Technology 7 Geography 7 Science & Technology 8 Math 8 Geography 9: Issues in Canadian Geography Science 9 (Academic & Applied) Science 10 (Academic & Applied)	Interactions in the Environment Physical Patterns in a Changing World Water Systems Data Management Interactions in the Physical Environment Biology: Sustainable Ecosystems Earth and Space Science- Earth's Climate
Corals and Chemistry	http://resources4rethinking.ca/en/resource/corals-and-chemistry	Students explore the impacts of climate change on the oceans with particular attention to coral reefs. Subject content: carbon cycle, fossil fuels, ph, coral reef ecosystems	Science & Technology 7 Science & Technology 8 Science 9 (Academic & Applied) Science 10 (Academic & Applied) Science 10: Academic & Applied)	Interactions in the Environment Water Systems Biology: Sustainable Ecosystems Chemistry: Chemical Reactions Earth and Space Science- Earth's Climate
Heat Up Over Climate Change	http://r4r.ca/en/resource/heat-up-over-climate-change	Explores the social, economic & environmental effects of climate change on children. <i>Subject content-</i> climate change cause and effects, global connections, social justice	Social Studies 6 Geography 7	People & Environments Physical Patterns in a changing world
Sow the Seed	http://www.resources4rethinking.ca/en/resource/sow-the-seed	Examines the impact of climate change on agriculture. <i>Subject content-</i> plant growth, impacts of climate change around the world	Social Studies 6 Geography 7 Science & Technology 7	People & Environments Physical Patterns in a Changing World Interactions in the Environment
Climate Change: Connections & Solutions (6-8)	http://r4r.ca/en/resource/climate-change-connections-and-solutions-gr-6-8	Examines the economic, social and environment dimensions of CC. <i>Subject content-</i> Carbon cycle, greenhouse effect, energy sources, climate change	Science & Technology 6 Science & Technology 7 Math 6, 7 & 8 Social Studies 6	Electricity & Electrical Devices Interactions in the Environment Data Management People & Environments
Climate Change: Creating Solutions for our Future	http://www.resources4rethinking.ca/en/resource/climate-change-creating-solutions-for-our-future	Explores the past, present & future aspects of climate change. <i>Subject content-</i> greenhouse effect, CO2 emissions, weather & climate	Science & Technology 5 Science & Technology 6 Science & Technology 7 Geography 7 Science & Technology 8	Conservation of Energy Biodiversity Interactions in the Environment Physical patterns in a changing environment Systems in action
Sunny Schools Resources	http://resources4rethinking.ca/en/resource/sunny-school-resources	Multi activity resource that examines the climate change cause , effects around the world and the importance of investments in renewable energy	Science & Tech. 5 Science & Technology 6 Geography 7 Geography 9	Conservation-Energy & Res Electricity Natural resources & Sustainability Interactions- Physical
Real World Math	http://www.resources4rethinking.ca/en/resource/real-world-math-lessons-7-9-and-12	Students use climate change examples to write, graph and solve inequalities. <i>Subject content-</i> solving inequalities, carbon footprint, greenhouse gases	Math 8	Measurement & number sense

Electricity Earth & Space- Climate Solutions to Challenges Conservation of Energy Sustainability of Natural Resources
Understanding Climate Change in Grade 11 & 12 Geography	http://resources4rethinking.ca/en/resource/understanding-climate-change-in-grade-11-and-12-geography	This resource provides information and inquiry-based activities concerning climate change.	Regional Geography 11 Environ. & Resource Mgt. 12 (Univ./College) Environ. & Resource Mgt. 12 (Workplace)	Dynamics and Change Sustainability & Stewardship Sustainability & Stewardship Human-Environment Interactions
Connecting Climate Change Through Rich Performance Tasks in Grade 10 Science	http://resources4rethinking.ca/en/resource/connecting-to-climate-change-through-rich-performance	Another inquiry based approach to the study of climate change. Includes a look at the chemistry of climate change and an option of 2 culminating tasks	Science 10 (Academic & Applied)	Earth & Space-Climate -Human Impact
Climate Change, Poverty and Women	http://resources4rethinking.ca/en/resource/climate-change-poverty-and-women	Examines climate change as a human crisis through activities that focus on how the most vulnerable are being affected	Social Studies 11 Social Studies 12	Equity, diversity, social justice Global social challenges
The Heat is On	http://www.resources4rethinking.ca/en/resource/the-heat-is-on-cause-and-effect-and-climate-change	Examines correlation & causation within the context of climate change. Specific attention to impacts of human activity on climate	Science & Tech. 7 Science 10 (Academic & Applied) Environmental Science 11 (Univ. & Workplace)	Heat and the Environment Earth & Space Science: Climate Conservation of energy

Resource Title	Review	Synopsis	Curriculum Fit	
			Course	Unit
Moving Oil	http://www.resources4rethinking.ca/en/resource/moving-oil-case-study	In this case study approach, students examine the different ways oil is transferred from place to place and consequence of each	Issues in Canadian Geography 9 Environmental Science 11 (Univ/College) Environmental Science 11 Regional Geography 11 Technological Ed. 11 & 12	Managing Canada's Resources Solutions to Challenges Human Impact on the Environ. Sustainability & Stewardship Technology, Environment & Society
Weather Makers	http://resources4rethinking.ca/en/resource/weather-makers-secondary	This comprehensive, 15-lesson unit addresses climate science, climate change causes & consequences and encourages students to act on their learning	Science 7 Science 8 Science 9 (Academic & Applied) Science 10 (Academic & Applies)	Heat in the Environment Water Systems Biology: Sustainable Ecosystems Earth & Space Science: Climate Chemistry: Chemical Reactions
Climate Change & the Arctic	http://resources4rethinking.ca/en/resource/climate-change-and-the-artic	Students identify patterns and trends in Arctic sea ice using maps and satellite imagery then make predictions about the extent and impact of future changes in the Arctic.	Issues in Canadian Geog. 9 (Academic & Applied) Science 9 (Applied) English 10 Science 10 (Applied) Environmental Science 11 (Workplace) Regional Geography 11	Geographic Inquiry Biology: Sustainable Ecosystems Media Studies Earth And Space Science: Climate Human Impact on the Environ. Dynamics and Change Sustainability and Stewardship

B. Short Videos

Resource Title	Review	Synopsis	Curriculum Fit	
			Course	Unit
Unlimited Renewable Energy in the 21 st Century	http://www.resources4rethinking.ca/en/resource/unlimited-renewable-energy-in-the-21st-century	A documentary in which a group of passionate grade six students call on adults to take action to address global warming	Sci & Technology 5 Sci & Technology 6 Geography 7	Conservation of Energy & Resources Electricity & Electrical Devices Natural Resources: Use & Sustainability
Oil Sands Field Trips	http://www.resources4rethinking.ca/en/resource/oil-sands-field-trips	This four-part series takes viewers on video field trips to the Alberta oil sands. Students learn what oil sand is, why it is important, how it is taken out of the ground and the challenges involved.	Geography 7 Science & Technology 7 Issues in Canadian Geography 9 (Academic & Applied)	Natural Resources: Use & Sustainability Interactions in the Environment Interactions in the Physical Environment
Kids vs Global Warming	http://www.resources4rethinking.ca/en/resource/kids-vs-global-warming	Introduces a remarkable young teenager who crusades against global warming	Social Studies 6 Geography 7	People and Environments Natural Resources...Use & Sustainability
This Bulb	http://video.nationalgeographic.com/video/this-bulb-ngv	Natalie Portman, Kyra Sedgwick and Chloe Sevigny explain how small changes in lifestyle can help reduce greenhouse gas emissions.	Science 5 Science 6 Social Studies 6 Geography 7	Conservation of Energy Electricity and Electrical Devices People and Environments Natural Resources...Use & Sustainability

Climate Change, Wildlife and Wetlands	http://resources4rethinkking.ca/en/resource/cliente-change-wildlife-wildlands	Impact of CC on Wildlife. Challenges students to "go outside" and examine how nature is changing. Students are also encouraged to adopt lifestyle choices and actions to help make a difference	Science & Technology 6 Social Studies 6 Science & Technology 7 Science 9 (Academic & Applied) Science 10 (Academic & Applied)	Biodiversity People and Environments Interactions Sustainable Ecosystems Earth & Space: Climate
The Big Thaw	http://resources4rethinkking.ca/en/resource/the-big-thaw	This video uses an effective combination of visual and narrative to introduce students to this unique bio-region and what the changes there tell us about climate change.	Aboriginal Studies 10 Social Studies 11 Social Studies 12 Aboriginal Languages and culture 10 Environmental Science 10 Geography 11 Science 11	Origin and Settlement Patterns Human Geography Aboriginal Studies Contemporary Indigenous Studies First Nation Studies Cultural and Linguistic Diversity Citizenship and Sustainability Global Issues Experiential Science Marine Systems
Sea Level Rise	http://resources4rethinkking.ca/en/resource/sea-level-rise	This video examines the causes and consequences of climate change.	Geography 12 Geography 10 Science 10 Social Studies 12 Science 11 Social Studies 11	Canadian Geography Ocean Environment Land Environment Weather and Climate Weather Dynamics World Issues Experiential Science: Marine Systems Experiential Science: terrestrial Systems Human Geography
Climate Change Adaptation: It's Time for Decisions Now	http://resources4rethinkking.ca/en/resource/cliente-change-adaptation-its-time-for-decisions	This video serves to make students aware that the effects of climate change are here and there is urgency in considering how we are to adapt to this reality	Social Studies 11 Science 12 Geography 12 Environmental Studies 12 Geography 11 Science and Technology 10	Human Geography Environmental Science Physical Geography World Geography Northern Climate Impacts of Change The Earth and Space
Global Warming: It's All About the Carbon	http://www.resources4rethinking.ca/en/resource/global-warming-its-all-about-carbon	The 5-part video package delivers entertaining chemistry lesson on the behavior of the carbon atom and its role in global warming	Science 10 (Academic & Applied) Chemistry 11 Environmental Science 11 (Workplace Prep)	Earth and Space- Climate Hydrocarbons and Energy Human Impact on the Environment
Can Animals Adapt to Climate Change	http://www.resources4rethinking.ca/en/resource/can-wildlife-adapt-to-climate-change	This Ted Ed Talk examines how plants and animals are adapting to our changing climate	Biology 11 (Univ. Prep) World Issues: A Geographic Analysis 12	Evolution Sustainability & Stewardship
Climate Change 101 with Bill Nye	http://www.resources4rethinking.ca/en/resource/climate-change-101-with-bill-nye	Bill Nye explains what causes climate change, how it affects our planet, why we need to act promptly to mitigate its effects, and how each of us can contribute to a solution.	Issues in Can. Geography 9 Science 9 (Academic & Applied) Exploring Technologies 9 (Open) Science 10. Academic & Applied	Interactions in the Physical Environment Sustainable Ecosystems Technology, the Environment & Society Earth and Space- Climate
Chasing Ice	http://www.resources4rethinking.ca/en/resource/chasing-ice	Graphic illustration of the melting of arctic ice	Issues in Can. Geography 9 Science 10 Regional Geography 11 Living in a Sustainable World 12 Env. & Resource Mgt.12 (workplace)	Interactions in the Physical Env. Earth & Space Science- Climate Dynamics and Change Ecosystems & Human Activity Human-Environment Interactions

		impact of fast food on greenhouse gas emissions.	Living in a Sustainable World 12	Human Impact on the Environment. Ecosystems and Human Activity
When a Town Runs Dry	http://www.resources4rethinking.ca/en/resource/when-a-town-runs-dry	Documents the effects of severe drought on lives of those living in a small farming community	Science 10 (Academic & Applied) Environmental Science 11 (Univ./College) Environmental Science 11 (Workplace) Forces of Nature & Regional Geography 11 Living in A Sustainable World 12 The Environment & Resource Mgt. World Issues 12 (Univ. & College)	Earth & Space Science: Climate Sustainable Agriculture Human Impact on the Environment Sustainability & Stewardship Sustainability of Natural Resources Human-Env. Interactions Sustainability & Stewardship
What's the Deal with Fossil Fuels	http://www.resources4rethinking.ca/en/resource/whats-the-deal-with-fossil-fuels	Fossil fuels. What they are. Why they are a problem. Steps for reducing reliance	Geography 7 Issues in Canadian Geog. 9 (Academic & Applied) Science 9 & 10	Natural Resources: Use & Sustainability Managing Canada's Resources & Industries Chemistry & Earth & Space Science: Climate

C. Children's Books/Novels

Resource Title	Review	Synopsis	Curriculum Fit	
			Grades	Subjects
How We Know What We Know About Our Changing Climate	http://resources4rethinking.ca/en/resource/how-we-know-what-we-know-about-our-changing-climate	Introduces young people to current climate change research. Emphasis is placed on the importance of citizen science	Grades 5 - 8	Science, Geography, Geography
Judy Moody Saves the World	http://www.resources4rethinking.ca/en/resource/judy-moody-saves-the-world	Judy Moody wonders how one person can "heal the world". The story chronicles her personal efforts.	Grades 3 and 4	Literacy, Language Arts, Science
Empty	http://resources4rethinking.ca/en/resource/empty	Exciting drama that offers a glimpse of what our world might look with a continued reliance on fossil fuels	Grades 6-9	Literacy, Science, Geography
Siberia	http://www.resources4rethinking.ca/en/resource/siberia	The novel describes a world of the future where climate change and habitat destruction have ravaged the Earth. Rosita and Mama struggle to eke out an existence in their bleak environment.	Grades 5-8	Literacy, Language Arts, Science & Social Studies
Ship Breaker	http://www.resources4rethinking.ca/en/resource/ship-breaker	Many problems resulting from climate change are exposed in this suspense novel based on salvage practice known as 'ship breaking'	Grades 9-11	Literacy, Language Arts, Science & Social Studies
